	Examiner Amy A. Lewis	Art Unit 1614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 November 2005.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.

DETAILED ACTION

Status of the Case

The Amendments and Remarks, filed 25 November 2005, have been entered into the application. Accordingly, claims 1, 2, and 16 have been cancelled, and claims 30-45 have been added.

Claims 30-45, as filed 25 November 2005, are presented for examination.

Response to Remarks:

1) Claims 1, 2, and 16 were provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2, and 16 of copending Application No. US 2004/0235940 A1.

This rejection is rendered *moot* due to cancellation of the claims.

2) Claims 1, 2, and 16 were rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 12 of U.S. Patent No. 6,576,659

B1. This rejection is rendered *moot* due to cancellation of the claims.

3) Claims 1, 2, and 16 were rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 12 of U.S. Patent No. 6,828,313

B2. This rejection is rendered *moot* due to cancellation of the claims.

The following new rejections are necessitated by amendment:

Double Patenting

Obviousness Type Double Patenting:

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1) Claims 30-45 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15-28 of copending Application No. US 2004/0235940 A1.

Instant claims 30-45 are drawn to a method of promoting weight gain after weight loss resulting from post-burn catabolism in a patient which comprises administering a therapeutically effective amount of oxandrolone in conjunction with a protein supplement. Conflicting claims 15-28 of US 2004/0235940 A1 are drawn to the same method of treating burn-induced weight loss in a patient comprising administering oxandrolone in conjunction with a protein supplement. Claims 15-29 of US 2004/0235940 A1 patent specify the same routes of administration and dosages of oxandrolone. Since the same agent (oxandrolone) is being used to treat the same

Art Unit: 1614

conditions (burn induced weight loss), the instant application is an obvious variation of claims 15-29 of US 2004/0235940 A1.

2) Claims 30-45 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-20 of U.S. Patent No. 6,576,659 B1.

Instant claims 30-45 are drawn to a method of promoting weight gain after weight loss resulting from post-burn catabolism in a patient which comprises administering a therapeutically effective amount of oxandrolone in conjunction with a protein supplement. Conflicting claims 12-20 of U.S. Patent No. 6,576,659 B1 are drawn to the same method of treating burn-induced weight loss in a patient comprising administering oxandrolone in conjunction with a protein supplement. Claims 12-20 of the '659 patent specify the same routes of administration and dosages of oxandrolone. Since the same agent (oxandrolone) is being used to treat the same conditions (burn induced weight loss), the instant application is an obvious variation of claims 12-20 of U.S. Patent No. 6,576,659 B1.

3) Claims 30-45 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 18-31 of U.S. Patent No. 6,828,313 B2.

Instant claims 30-45 are drawn to a method of promoting weight gain after weight loss resulting from post-burn catabolism in a patient which comprises administering a therapeutically effective amount of oxandrolone in conjunction with a protein supplement. Conflicting claims 18-31 of U.S. Patent No. 6,828,313 B2 are drawn to the same method of increasing weight gain after burn-induced weight loss in a patient comprising administering oxandrolone in conjunction

Art Unit: 1614

with a protein supplement. Claims 18-31 of the '313 patent specify the same routes of administration and dosages of oxandrolone. Since the same method and agents are being used to treat the same condition, i.e. burn-induced weight loss, the instant application is an obvious variation of claims 18-31 of U.S. Patent No. 6,828,313 B2.

Conclusion

Claims 30-45 are rejected. No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
